PLANTING SEASONS

EVERGREENS may be planted from the time the frost leaves the ground until the latter part of June, though early planting is much preferred. Some varieties of evergreens, however, can be moved more or less satisfactorily all during the Summer months. August, September and October are also excellent months for moving evergreens.

Plant shrubs, trees, and fruit trees from the latter part of March till June, and in the Fall from the middle of October until the ground freezes.

Pot grown Roses can be moved throughout the entire Summer season and will continue to bloom.

GENERAL DIRECTIONS FOR ORDERING AND OUR TERMS

In ordering, always give explicit directions as to address and desired time of delivery. Otherwise, we will use our best judgment and forward by most economical route. Practically all our deliveries will be made by our trucks.

Because of our rapidly expanding business and increased trucking facilities, we are extending our free delivery radius on orders amounting to \$10.00 or more, to within a 25 mile radius of our nursery. This will enable our distant customers to get the benefit of local prices. During planting season loads are combined for each locality at least twice a week. Beyond this 25 mile radius a small charge will be made for delivery to cover cost, unless otherwise arranged for at time of sale.

The cost of planting, if desired, is to be borne by the purchaser. This charge is to merely cover the cost of labor, fertilizer, etc.

GUARANTEE

Because all our stock is freshly dug and reaches the customer in fine, healthy condition, and because of the utmost care and skill used in growing our plants, we agree to resupply any plants sold at the within published prices, that may die within one year from date of delivery from causes other than abuse or neglect, making the following reservations:

The account to be paid within 30 days from date of invoice.

The customer to pay the cost of delivery and planting of the replaced plants.

That in the event we shall not have in stock, at the time for replacement, plants like those originally supplied, we are to apply the amount of credit representing the cost of the original plants toward the purchase of other plants that the customer may at the time select and which we can supply.

We guarantee our stock to be true to name and will replace any that may prove otherwise or refund purchase price.

A Cordial Invitation is Extended to You

VISIT our nursery and see the wide variety of plants growing here, and the many acres of choice stock from which to make your selections. You will find it a most interesting visit as every type of evergreen, tree, shrub and plant is represented. We welcome the opportunity of showing you around and helping you in making decisions on the plants best suited for your purpose.

Our office and Nurseries are on the Merrick Road, one mile west of the village of Babylon, L. I. You can't miss it, just look for the Dutch Windmill. During Spring and Fall our office and nurseries are open to visitors on Sundays.

SELECT YOUR PLANTS AT THE NURSERY

During planting season we have a staff of men on hand ready to dig your order of fresh-dug plants. In this way it is possible for you to drive to the nursery in your car and take your plants home with you. Or you can label the plants you select, and have them delivered through our regular delivery service.

Select flowering trees and shrubs while in bloom. We cordially invite you to visit the nursery in the growing season when the trees and shrubs are in full bloom.

LANDSCAPE SERVICE

Our landscape department is ready to assist and help you with every type of planting work. We will gladly draw sketches and plans to fit your particular need.

This service in most cases is rendered free of cost, except where elaborate plans, specifications, and special trips are necessary in which case a small fee will be charged, which will be credited to customers' account when order is placed.

Our landscape representative is frequently in your vicinity, and will be glad to stop at any time to offer advice and make suggestions.

Landscape work is a science as well as an art. In order to accomplish satisfactory results one must know thoroughly the characteristics of the various plants, such as the height they attain, their time of flowering, their ultimate shape, suitability for sun or shade, adaptation to soil and exposure, etc. Our landscape men are well prepared through training and experience to advise you.

Appointments, at your home, for any day in the week, including Sundays, will be gladly made and kept.

SPECIAL SERVICE

We are prepared and equipped to take care of all kinds of garden work, such as general overhaul, Summer and Winter pruning, spraying, hedge trimming, fertilizing, Winter mulching, tree repair work, etc. Competent gardeners are on hand at the proper seasons to do this work for you. Such work is important and should only be entrusted to capable men who thoroughly understand it.

PRICES SHARPLY REDUCED

In keeping with present conditions we have gone carefully over every item in this catalog, and have made every possible sacrifice to bring prices down to match lower income.

On the basis of equal quality we invite you to compare our prices with those of any other reliable nursery, anywhere.

EVERGREENS

IN this group are contained some of the most valued plants for landscape effects. The diversity of color and habit of growth in this class provides truly "a plant for every place and purpose," some for limited areas of foundation plantings or for bed and border uses, others for screens, hedges, windbreaks, and for group and specimen plantings. They are always desirable for any landscape plantings for both summer and winter effects.

A Few Practical Hints on Planting

Always keep roots covered when plants are out of the ground.

Dig hole large enough to receive plant without bending roots.

Break up sub-soil and mix it thoroughly with rotted stable manure.

Set plants slightly deeper than they stood at the nursery.

Work in good soil among roots so as to leave no air pockets.

Fill hole and tamp soil down thoroughly with the heel of shoe.

Leave slight depression around plant to catch the water, and water thoroughly.

A booklet with more detailed planting instructions will be gladly sent upon request free of charge.

PINUS · The Pines

Pinus montana muhghus. *Mugho Pine.* Dwarf evergreen. Slow growing, very hardy, compact and neat in habit. Most valuable where a low, dense evergreen growth is desired and excellent for rock gardens and foundations.

Mass Planting of Hybrid Rhododendrons See page 12

EVERGREEN SHRUBS

WITH few exceptions, no grounds, either small or extensive, should be without some representative of this rich and interesting group of plants. They endure shade and their rich blossom and foliage effect makes them almost indispensable. Certain varieties of this class, such as Rhododendrons, Azaleas, and Laurel ordinarily grow more satisfactorily and show to better advantage when planted in rather heavy masses. A deep, cool, moist subsoil, with proper drainage, is ideal.

The following list comprises the most popular varieties.

ABELIA grandiflora. *Glossy Abelia.* Bright, shiny foliage and a mass of light pink blossoms from July until frost. Dwarf in habit, making it most useful for adding color to the foreground.

Arborvitae Hedge

At a price you can afford

EVERGREEN HEDGES

FROM time immemorial people have used hedges and fences to protect that which they cherish from intrusion, and to secure privacy. Up until the present time an evergreen hedge meant quite an expense, but with the great reduction in price of evergreens, evergreen hedges have now come down to a price level within the reach of every homeowner. We invite you to compare the prices listed below with the cost of a fence.

Evergreen hedges are as beautiful in Winter as in Summer, and they represent a living fence that does not depreciate with the years.

Their uses are legion: such as for screens, walls for the out door living room, barriers against prowling dogs and blowing trash, backgrounds for Rose and perennial gardens, windbreaks, etc. There is a type of evergreen to suit every hedge requirement.

The evergreens quoted below, while not quite as full as those sold as individual plants, are good, healthy plants and are just the thing for hedges.

ARBORVITAE HEDGES

American Arborvitae makes a very dense, fast growing hedge and will grow to considerable height if left to grow. Set plants between 2 and 3 feet apart.

American Arborvitae.

CYPRESS HEDGES

There are many forms of Cypress admirably adapted for hedge planting. The old favorite, Plume Cypress, makes a compact and fast growing hedge. The delicate, plummy foliage gives it a soft effect which is very pleasing.

The Sawara Cypress and Hinoki Cypress are also good subjects for hedges. The latter particularly for a background for perennials because of its rich green color.

Then there are the Golden Types which create hedges that are pleasingly different. Set Cypress from 2 to 3 feet apart.

JAPANESE YEW (TAXUS) HEDGE

Without doubt this is the grandest subject of all the evergreens for hedges. In England and on the Continent, Yew hedges make up a large part of the charm of the landscape. The deep, rich, dark green foliage makes the Yew hedge a beautiful thing to behold. Plant a Yew hedge now and enjoy it all the days of your life.

ORNAMENTAL AND SHADE TREES

IN addition to the trees which are valued for their shade, there are flowering trees which, at different times during the Spring and Summer, shower the lawn with their bloom. Do not forget that while shade trees add materially to the property value and landscape charm of your home, the initial cost is very small as compared with the enjoyment that you receive. The average shade tree is a long investment and returns your money manifold throughout the years of its usefulness.

FLOWERING SHRUBS

WHETHER planted individually or collectively, shrubs are an important feature in the adornment of any grounds. In groups they can be made to emphasize some feature of the lawn, to screen the garage, the laundry yard, or some unsightly view. Among borders of the lawn, along walks and drives and in corners, collections of shrubs may be gathered that will give a succession of bloom from early Spring until Fall. In the list that follows will be found shrubs for all such purposes.

AMYGDALUS communis. *Double Pinkflowering Almond.* Produces very double, pink flowers in great abundance in May. A most charming early flowering shrub.

HARDY ROSES

ROSES—the mere name is an inspiration to garden lovers. Nothing can take the place of the Rose. Almost every home has room for at least a few. Roses will grow in any fertile soil, but are much improved in bloom, fragrance, and beauty by rich soil, liberal fertilizing, and good cultivation. Branches should be well cut back early each Spring.

HARDY PERENNIALS

IT is no wonder that these old-fashioned hardy garden flowers continue to increase in popularity, for there is not a time during the whole flowering season when some hardy perennial is not in bloom, and when, during the late Summer, few shrubs are in blossom, these little plants may be depended upon for attractive display.

Plant perennials this year in the flower-bed where you have been using annuals. Every year you have to replace annuals, whereas the perennials come up each season with very little work or expense.

You do not need a large estate to have an old-fashioned garden or border from which you can pick flowers from early Spring until late Fall. Let us help plan your garden.

The size mentioned in the description indicates the height the plants may be expected to attain at maturity: the month represents the season of bloom.

USE PEAT MOSS

To improve the condition of your soil

It is vitally important that flowers, trees and shrubs have a constant moisture supply. Granulated Peat Moss when worked into the soil is like millions of tiny sponges which give off moisture to plant roots as they need it. It is cheaper than manure and more satisfactory. Use it as a mulch on new plantings of Evergreens, Bulbs and Perennials.

FRUITS

IN the extremities of the lawn or upon the adjoining lot, plant fruit trees. They will bountifully reward you in the fruit they yield and which you will enjoy eating right from the trees or in winter as preserves and jam. The fruit-garden can easily be made a part of the scheme for beautifying your property. Flowers along the walk to the orchard will brighten the way and provide flowers for cutting. The following is a limited selection of varieties that we know will do best on Long Island.

APPLES

EARLY VARIETIES

Red Astrachan. Red. July, August.
Yellow Transparent. Yellow. July, August.

AUTUMN VARIETIES

Fameuse. Deep red skin.
McIntosh. Red. November to February.

WINTER VARIETIES

Baldwin. Red. January to April.
Delicious. Yellow and red. November to January.
Rhode Island Greening. Greenish yellow. Dec. to April.

5 yrs., large.....	3.50

QUINCES

Champion and Orange.

	Each
3 yrs.....	\$1.50
4 yrs.....	2.00

Plant a few fruit trees anyway. They are ornamental, and then no matter how plentiful fruit may be on the market, there's a flavor to one's own productions in the orchard and garden that just can't be found elsewhere.

GRAPES

Catawba. Fine red Grape.

Concord. Blue; early; fine flavor. Most popular standard Grape grown today.

Niagara. The best standard white.

Worden. Black; large berries.

	Each	10
Strong, 2 yr. old plants.....	\$0.50	\$4.50
Strong, 3 yr. old plants.....	.75	7.00

Extra strong. 25c. each, \$2.00 for 10.

RHUBARB

Linnaeus. 30c. each, \$2.50 for 10.

Concord Grapes

Spraying of Fruit Trees

For best results we recommend three sprayings: First, during the Winter; second, after the blossoms fall; and, third, about two weeks later. This will control the most prevalent insects and fungous diseases attacking fruit trees on Long Island.

We have men experienced in this kind of work who are available at a moderate cost.
